

ON - SHORE TECHNOLOGY, INC.

RoHS 3/REACH Certificate of Compliance

Declaration in regards of RoHS-Directive 2011/65/EU, 2015/863/EU and REACH Regulation 1907/2006

We herewith certify that to the best of our knowledge all our products and all packaging material are manufactured in accordance with the RoHS-Directive 2011/65/EU, 2015/863/EU and REACH Regulation 1907/2006 and the PFOS-Directive 2006/122/ EU.

All On-Shore Technology Inc. products are compliant with the European Union Directive 2002/95/EC for Restriction of Hazardous Substances (RoHS) with certain series having the exception of 6c for Lead (Pb) which applies only to products with machined components. These series are documented in the "OST Series Exemption 6c" listed below. If not listed the series is compliant without any exemptions.

RoHS - Directive 2011/65/EU (RoHS II) supplemented by 2015/863/EU

The use of the following substances is limited by maximum permissible concentrations in percent by weight for each homogeneous material (values in brackets = maximum permissible concentration) as follows:

- Cadmium (Cd): 0.01%
- Mercury: 0.1%
- Lead (Pb): 0.1%
- Hexavalent chromium (Cr6+): 0.1%
- Polybrominated biphenyls (PBB): 0.1 %
- Polybrominated diphenyl ethers (PBDE): 0.1 %
- Bis(2-Ethylhexyl) phthalate (DEHP): 0.1% (added in 2015);
- Benzyl butyl phthalate (BBP): 0.1% (added in 2015);
- Dibutyl phthalate (DBP): 0.1% (added in 2015);
- Diisobutyl phthalate (DIBP): 0.1% (added in 2015).

Note

When considering the maximum concentrations in weight percent listed above, it should be noted that Annex III of Directive 2011/65/EU contains various exemptions for the maximum permissible concentrations under consideration of areas of application and validity periods, for example for lead (Pb, CAS No.: 7439 -92-1) in copper alloys (4% by weight according to Annex III, 6c).

Registration Evaluation Authorization and Restriction of Chemicals (REACH) EG 1907/2006

This regulation regulates the registration, evaluation, authorization and restriction of chemical substances and their proportion in mixtures and articles.

The goal of REACH is the safe use of substances and products and the passing on of relevant information within the supply chain. The information obligation according to REACH Article 33 for substances in products applies to so-called Substances of Very High Concern (SVHC).

The European Chemicals Agency ECHA decides on the inclusion of substances and adds them to the SVHC candidate list ([Candidate List of substances of very high concern for Authorisation - ECHA](#)).

On-Shore Technology Inc. is a downstream user within the meaning of this regulation.

According to the REACH regulation, the products we deliver are articles with no planned release of substances. Our products contain no Substances of Very High Concern (SVHC) and Substances restricted under REACH (Annex XVII) except for Lead (Pb) that only applies to the products with machined components. Refer to detailed list of series covered under the 6c exemption as stated above.

According to the information available to us from the supply chain, we inform you that a proportion > 0.1 % is possible for the following substances from the SVHC list:

Area of Application	Substance	CAS #
Machined components: Copper alloys or which themselves contain components made from these alloys	Lead (Pb)	7439-92-1

Annex XVII to REACH contains 74 unique substances/entries as of 9/20/2024
247 SVHC materials according to the REACH candidate list dd. 1/21/2025

All data and information in this declaration of conformity are based on information from the manufacturers in the supply chain. Even if On-Shore Technology Inc. considers this data and information to be reliable, no guarantee is given for the correctness and completeness of the data and information. This data and information are passed on without any intention to be legally binding and does not constitute an independent contract.

This statement was created and issued based on the laws and regulations applicable at the time of creation and to the best of our current knowledge.

Peter Huang, QC Engineer
